

## Correction to Natural Colloidal P and Its Contribution to Plant P Uptake

Daniela Montalvo,\* Fien Degryse, and Mike J. McLaughlin

*Environ. Sci. Technol.* **2015**, 49, 3427–3434; DOI: 10.1021/es504643f

An error was found in Figure 1 of the published version of the paper “Natural Colloidal P and Its Contribution to Plant P Uptake”. In the published paper the X-axis label, concentration of free P is expressed in millimolar (mM) this is incorrect. The correct unit is micromolar ( $\mu\text{M}$ ) as shown in the below Figure 1.

**Figure 1.** Phosphorus uptake flux into roots from centrifuged nonfiltered and 3-kDa filtered soil solutions (1 h uptake) as a function of the free orthophosphate concentration. Closed symbols for nonfiltered (NF) soil solutions and open symbols for 3 kDa-filtered soil solutions. Error bars give the standard error of four replicates. (CH: Chile; NZ: New Zealand; ECU: Ecuador, AUS: Australia).
