

Correction to Iridium Pincer Catalysts for Silane Dehydrocoupling: Ligand Effects on Selectivity and Activity

Neil T. Mucha and Rory Waterman*

Organometallics 2015, 34 (15), 3865–3872, [10.1021/acs.organomet.5b00486](https://doi.org/10.1021/acs.organomet.5b00486)

Compound **1** is dimeric in the solid state, but only one-half of that dimer is shown in Figure 1 for comparison to compounds **2** and **4**. No effort was made to characterize the speciation of **1** in solution, which is likely in an equilibrium between the monomer and dimer. We apologize for any confusion this may have caused and are grateful to Prof. Oleg Ozerov for alerting us to this issue.
