There was an error in eq 9A. The correct form of that equation is

$$I_{T,\infty} = i_{T,\infty}/4nFDc^*a$$

$$= 1/(1.0354 + 1.2621H + 0.01155 \ln H) \quad (9A)$$

No numerical results in the article, including the data in Table 1 referring to eq 9A, were affected by this typo.
