

Correction to Spectrophotometric Calibration of pH Electrodes in Seawater Using Purified m-Cresol Purple

Regina A. Easley and Robert H. Byrne*

Environ. Sci. Technol. **2012**, *46*, 5018–5024; DOI: 10.1021/es300491s

In the original published version of the manuscript, eq 12 is appropriate to $T = 273.15$ K ($t = 0$ °C) and $S = 35$. The equation appropriate to $T = 298.15$ K and $S = 35$, is given as

$$\text{pH}_T(25^\circ\text{C}, S = 35) = 7.6479 + \log \frac{(R - 0.0057)}{(1 - 0.0568R)} \quad (12)$$
