

Correction to Nematicidal Activities of 4-Quinolone Alkaloids Isolated from the Aerial Part of *Triumfetta grandidens* against *Meloidogyne incognita*

Ja Yeong Jang, Quang Le Dang, Yong Ho Choi, Gyung Ja Choi, Kyoung Soo Jang, Byeongjin Cha, Ngoc Hoang Luu, and Jin-Cheol Kim*

J. Agric. Food Chem. **2015**, 63 (1), 68–74. DOI: 10.1021/jf504572h

During the review process of our paper, waltheriones E–L were reported from the roots of *Waltheria indica* in *Journal of Natural Products* **2014**, 77, 2304–2311.

The use of the same name to describe two different compounds will bring some confusion to the scientific community. Therefore, we want to change the name of our new compound to 5'-methoxywaltherione A as follows: All instances of "waltherione E" in text, figures, and tables, should be changed to 5'-methoxywaltherione A. In addition, p 71, right-hand column, lines 3 and 4, should read "Thus, compound **1** was identified as 5'-methoxywaltherione A (Figure 2)." On p 72, paragraph 4, line 7, "waltherione A and E" should be "waltherione A and 5'-methoxywaltherione A".
