

# Correction to the Supporting Information of Real-Time Fluorescent Image Analysis of DNA Spot Hybridization Kinetics to Assess Microarray Spot Heterogeneity

Archana N. Rao, Christopher K. Rodesch, and David W. Grainger\*

*Anal. Chem.* **2012**, *84* (21), 9379–9387. DOI: 10.1021/ac302165h

## Supporting Information

This correction is to improve the Supporting Information. Namely, that (1) insufficient details were presented to understand the data and figure legends and (2) further interpretation details are required to improve the clarity and communication for our figures shown. Nothing in the published manuscript has been altered.

Specifically,

Figure S-2: Details about the real-time DNA duplex kinetics curve have been added to the figure legend.

Figure S-3: The figure legend has been rewritten to provide more information on the points.

Figure S-6: Has been replaced since the error bars were incorrect on this figure and the legend has been rewritten to reflect this.

Figure S-7: More information about case 1 has been added to the figure legend.

Figure S-9: More detail has been added to the figure legend.
