

## Correction to Polymorphism and Polytypism of $\alpha$ -LiNH<sub>4</sub>SO<sub>4</sub> Crystals. Monte Carlo Modeling Based on X-ray Diffuse Scattering

Dorota Komornicka, Marek Wolcyrz,\* and Adam Pietraszko

*Cryst. Growth Des.* **2014**, *14*, 5784–5793. DOI: [10.1021/cg501044n](https://doi.org/10.1021/cg501044n)

Formulas 1 and 2 should be changed to

$$H = \sum_{i=1\dots n} [J_1\delta(s_i, s_{i+1}) + J_2\delta(s_i, s_{i+2}) + J_4\delta(s_i, s_{i+4})] \quad (1)$$

$$H = \sum_{i=1\dots n} J_1^a\delta(s_i, s_{i+1}) + \sum_{j=1\dots n} J_1^c\delta(s_j, s_{j+1}) \quad (2)$$

All numerical data are correct.

In addition, the published CIF Supporting Information file has now been corrected in (and linked to) the original paper.
