J. Agric. Food Chem. **2015**, 63 (2), 578–587. DOI: 10.1021/jf505297t

In our paper, the dietary fiber contents of the test foods are shown in Table 3 to demonstrate their reduction upon dejuicing of fresh oranges. The values were shown in “g/100 g of dry weight (DW)”, although the footnote stated “g/100 g of fresh weight (FW)”. Consequently, on page 583, we erroneously compared the dietary fiber content of orange (DW) to that of tomato (FW). We calculated the dietary fiber level of oranges per g/100 FW (**2.2 g/100 g FW**), which should be used for this comparison instead.

This correction does not affect the validity of our discussion.
