

Correction to Formation of a Stacked Dimeric G-Quadruplex Containing Bulges by the 5'-Terminal Region of Human Telomerase RNA (hTERC)

Herry Martadinata and Anh Tuấn Phan*

Biochemistry 2014, 53 (10) 1595–1600. DOI: 10.1021/bi4015727

In Figure 4 of the original article, the numeration of the last guanine in all G-quadruplexes should be G17 (instead of G18). A new version of Figure 4 with correct G-quadruplex numeration is included below.

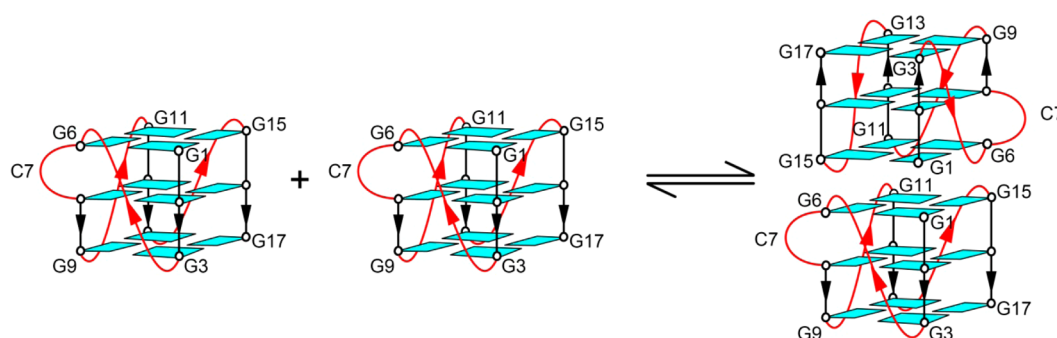

Figure 4. Proposed G-quadruplex folding topology and monomer–dimer equilibrium of TER18 in potassium solution.
