

**Correction to Characterization of Glycosaminoglycans by  $^{15}\text{N}$  NMR Spectroscopy and in Vivo Isotopic Labeling**  
[*Analytical Chemistry* 2010, 82, 4078 DOI: 10.1021/ac1001383].  
Vitor H. Pomin, Joshua S. Sharp, Xuanyang Li, Lianchun Wang, and James H. Prestegard\*

Assignments for  $^1\text{H}$ – $^{15}\text{N}$  cross-peaks of  $\alpha$ - and  $\beta$ -anomers in Figure 4, Figure S1, and Table 1 should be interchanged. References in the text to the anomeric configuration for these cross-peaks should likewise be interchanged. We express our thanks to Professor Cynthia Larive (University of California Riverside) for alerting us to this mistake.
