The authors note that the matrix additive structure described as 2-hydroxy-5-octyloxybenzoic acid (alkylated DHB, ADHB) is incorrect in the original manuscript, and the correct structure has been depicted in Figure 1 as octyl 2,5-dihydroxybenzoate.

**Figure 1.** Octyl 2,5-dihydroxybenzoate.

All the ADHB presented in the original manuscript is actually octyl 2,5-dihydroxybenzoate.
