

Correction to Co-Exposure of Carboxyl-functionalized Single-walled Carbon Nanotubes and 17 α -ethinylestradiol in Cultured Cells: Effects on Bioactivity and Cytotoxicity

Maoyong Song,* Fengbang Wang, Luzhe Zeng, Junfa Yin, Hailin Wang, and Guibin Jiang

Environ. Sci. Technol. **2014**, *48*, 13978–13984; DOI: 10.1021/es504216a

The authors regret that in our article,¹ there is an error in Figure 1, which should be replaced by the following

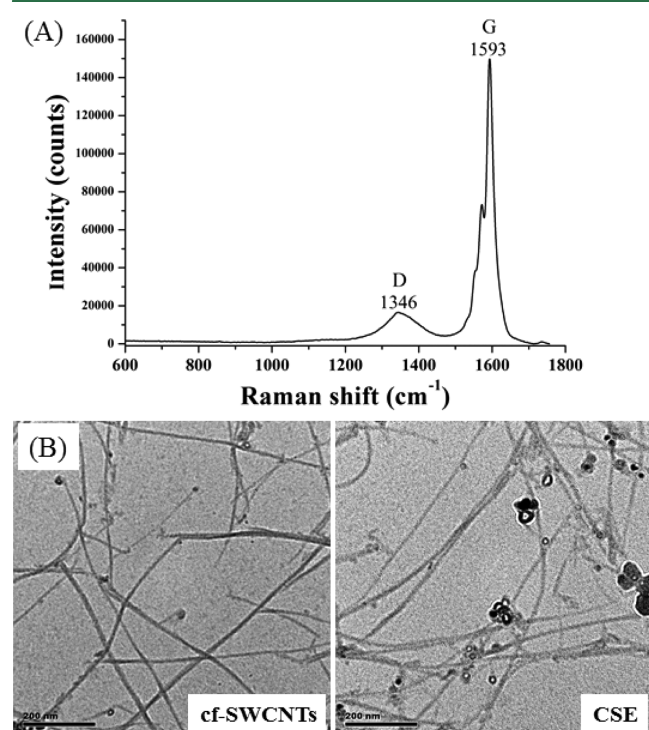

Figure 1. Characterization of cf-SWCNTs and CSE: (A) Raman spectra of cf-SWCNTs and (B) TEM images of cf-SWCNTs and CSE with 15 mg/g of adsorbed EE2.

Figure 1. We used wrong TEM image of CSE (right panel, Figure 1B) in previous version. The corrected TEM images of CSE showed that individual nanotubes was easily distinguishable in CSE samples.
