

## Correction to “Femtosecond Trapping of Free Electrons in Ultrathin Films of NaCl on Ag(100)”

David E. Suich, Benjamin W. Caplins, Alex J. Shearer, and Charles B. Harris\*

*J. Phys. Chem. Lett.* **2014**, 5 (17), 3073–3077. DOI: [10.1021/jz501572z](https://doi.org/10.1021/jz501572z)

A correction is made to Figure 3b. An incorrect data set was used for the y-axis during the revision process. The correct figure is below. No conclusions of the Letter are changed.

**Figure 3.** (b) Plot of localized state B lifetimes as a function of temperature for 3 MLE of NaCl grown at Ag = 400 K but measured at various substrate temperatures. Fits are only to the exponentially decaying portion of the population, as discussed.
