

## Correction to Electrochemical Detection of Low Concentrations of Mercury in Water Using Gold Nanoparticles

Noga Ratner and Daniel Mandler\*

Anal. Chem. 2015, 87 (10), 5148-5155. DOI: 10.1021/ac504584f

The authors note that the units of concentration of mercury mentioned in the manuscript as  $\mu m L^{-1}$  should be corrected and read as ng  $L^{-1}$ . Hence, for example, the lowest detection limit reported in the manuscript is 1 ng  $L^{-1}$ .
